3.15 Private Line and Dedicated Access Service - Cancellation of Application for Service

If Subscriber or applicant cancels an application for service prior to the start of installation of service, or prior to the start of special construction, no charge applies.

If installation of service has been started prior to the cancellation, a cancellation charge equal to the costs incurred by Carrier shall apply, but in no case shall such charge exceed the charge for the minimum period of the service ordered, including applicable installation charges, if any.

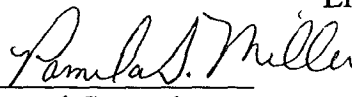

If Subscriber or applicant delays activation of his/her service during the period 30 days preceding the scheduled installation date for a period of more than one week, normal charges for local distribution facilities shall apply from the scheduled date of installation. In the event that the customer-induced delay exists for more than 30 days after the scheduled installation date, Carrier may consider the delay a cancellation of application for service.

In determining the charge, canceled service is treated as discontinued as of the date on which it was to have been placed in service. Installation or special construction for Subscriber or applicant is considered to have started when Carrier incurs any expense in connection therewith or in preparation therefor which would not otherwise have been incurred, provided that Subscriber or applicant had advised Carrier in writing not to proceed with the installation or special construction.

The discount shall not apply to sponsor charges associated with calls placed to pay-per call services, such as 900, 976, or 900-Like services.

4.3 Private Line Service

Private Line Service provides dedicated circuits which connect all locations of Carrier's network. This is a non-switched point-to-point service over fully dedicated lines at a fixed monthly rate. These circuits are dedicated to Subscriber for his exclusive use 24 hours per day. Facilities are offered in numerous configurations to meet the particular transmission needs of Subscriber. Private Line Service is available between Carrier's POPs in the LATAs listed in Section 1.2. 4.3.2 High Capacity Service

High Capacity Service is offered by Carrier between POPs on its microwave network. High Capacity Service is offered in the form of discrete inter-POP communication facilities which are dedicated to the use of a specific Subscriber and provide simultaneous transmission of asynchronous digital signals. Total charges for High Capacity Service are based on the distance between Carrier's POPs. Any local access arrangements will be charged separately. DS-1 Service provides inter-POP communications at the equivalent of twenty-four (24) voice channels (1.544 Mbps). DS-3 Service provides inter-POP communications at the equivalent of six hundred seventy-two (672) voice channels (45 Mbps).

4.4 Dedicated Access Service

Dedicated Access Service provides a transmission path to directly connect Subscriber-designated premises to Carrier POP. This service is basically a physical continuation of the inter-POP Private Line Service discussed in Section 4.3, in that Subscriber can obtain 24-hours per day dedicated lines at a fixed monthly rate directly between Subscriber's premises and Carrier's intercity network. T-1 Access Service is a high speed broadband, digital communications channel with a transmission rate of 1.544 Mbps, or the equivalent of 24 voice grade channels, utilizing a 64 Kbps bandwidth.
